

# NOTIFIABLE CONDITIONS

Notifiable Conditions are those conditions that are reportable to the local and state health departments by law. This is for the public's protection and helps the local health department track, detect and respond to diseases and disease outbreaks.

Several Texas laws (Health & Safety Code, Chapters 81, 84, and 87) require specific information regarding notifiable conditions be provided to the Texas Department of State Health Services (DSHS). Health care providers, hospitals, laboratories, schools, and others are required to report patients who are suspected of having a notifiable condition (Chapter 97, Title 25, Texas Administrative Code).

Release of this information is allowable under HIPPA regulations. Section 164.512(b) permits covered entities to release private health information to a public health authority that is authorized by law to collect and receive information for preventing and controlling disease. This information includes reporting of disease, public health investigations, and public health interventions. Under this exception you are authorized to release information to the public health department.

## General Instructions

In addition to the notifiable conditions, any outbreaks, exotic diseases, and unusual group expressions of illness must be reported, regardless of source. All diseases shall be reported at minimum by name, age, sex, race/ethnicity, DOB, address, telephone number(s), disease, date of onset, method of diagnosis, and name, address, and telephone number of physician.

Cases or suspected cases of illness considered to be possible public health emergencies, outbreaks, exotic diseases, and unusual group expressions of illness must be reported to the local health department immediately. Other disease for which there must be a quick public health response must be reported within one working day of suspicion. All other conditions must be reported within one week.

## Reporting

**Please report to: Juan Rodriguez, MPH, Chief Epidemiologist, (940) 349-2916, or Jennifer Ochieng, MPH, Epidemiology Investigator, (940) 349-2919, (940) 349-5078 confidential fax**
